Business Outlook

The industry which the Group is operating, i.e. the provision of waste management, cleaning and conservancy and horticultural services is highly competitive. The Group is competing on the basis of the quality of services provided, timeliness of service delivery and pricing as well as past track record. As a comprehensive environmental solutions provider, the Group will leverage on this to better compete for new projects.

The construction of the Group’s truck depot located in Tuas South has been completed and the Group is now using it for day to day operations.

The Group has started with the development of the biomass waste to energy (“WTE”) plant located at Tuas South, and has made capital commitments of more than 90% of the budget for the purchase of equipment and construction cost in relation to the plant. The total capital expenditure budget for the WTE plant is S\$ 31 million which is funded by internal sources and bank borrowings, and is targeted to complete in the second half of 2017. Upon its completion, the WTE plant will supply green electrical energy to the depot and material recovery facility, as well as generate new revenue streams and cost savings to the Group.
